DESCRIPTION

The path is very brief, but intense and it starts in prossimity of the Hotle Pomieri entrance. You can observe three different kind of monumental trees, they are within Petralia Sottana's territory and they are at 1300 metres about. The environmental contest is charcaterized by the woods of oaks and hollies and there is a strong presence of trees with extraordinary dimension.

The firstone that you can see is the 'Roveri of Pomerie', that is 600 years old about and 22 metres high. It presents a sturdy trunks of 7 metres circumference, that is divided in 4 big branches and the biggest one is 4 metres circumference.

The arrangement is particular, they have the shape of a candelabrum and they support a great hair, that usually is rounded and with an area of 450 square metres.

It follows a particular exemplary of campestry Maple tree, thta is 500 years old about and it is 15 metres high and it presents a sturdy trunks that could have a circumference of 4,20 metres at 1,30 metres high.

The trunk is more developped at the base because of the enlargement due to some growths of bacterial origin. At 2 metres about from the floor it is divided in different great branches that support a great hair with a rounded shape, which protection occupied an area of 200 square metres about.

The last exemplary of the path is represent by the mountain Maple tree of Passo Canale. The age is of 400 years about. At the base of his circumference it reaches 6 metres of lenght and the trunks is charcaterized by the presence of a deep cavity, that is there probably because of the action of a lightning and then improved by an intense action made by mashrooms, which generate the defenseless wood. The hair is inregular and it makes a shadow of 300 square metres.
